

Professor PhD Janek Musek: Opinion about My Very Own Book

Books have long embodied everything that a man can imagine or want. They present a unique and valuable trace, which is drawn not only by our ideas but our lives themselves. In the creation, achievements and legacy of a man, it is difficult to find anything that could stand up to a book.

Of course, not all the books are the same. Can you imagine a book that can hold records of one's visions, projects, and is also a personal testimony at the same time? A book, which can be an (auto)biography and a diary at the same time? A book, which may be philosophical reflection, psychotherapy, meditation, and a prayer at the same time? A book, which may be a poem, a story, a novel, and a drama at the same time?

You hold such a book in your hands, thanks to its author Žiga Vavpoti . Its special feature is that it can live its full life, and fulfil its real mission only through your personal creativity. It is made with the purpose to become your book, a project of your life.

Human creativity has no limits. And what can show us that better than a book? Books know how to be our most faithful fellows and companions. There are also the books that are created with the aim to be exactly that. This fact is proven by the Žiga Vavpoti 's My Very Own Book. I wish its readers and users find it to be indeed the one and the other.
